**Web Development Trainee**

Jun 2023 - Jul 2023

Rajavi Technology Pvt.Ltd

(Remote)Pune, Maharashtra

- Gained hands-on experience in web development through an extensive online program.
- Developed and learned the front-end of a responsive website using HTML, CSS, and JavaScript.

## PROJECTS

---

**FRIDAY: Personal AI Companion.** Led a team to build a desktop AI to optimize users tasks by using Python. Friday helps us automate our daily basic tasks like greeting and interaction, web browsing and entertainment, weather updates, and many more. It uses Natural Language Processing (NLP) to take our commands to execute them. Also implementation of various API's are done.

**College Website Integrated With AI Chatbot.** Developed a fully responsive and user-friendly [College Website](#) using HTML, CSS, and JavaScript, designed to provide detailed information about the VACOEA college's facilities, departments, and general services. Integrated with an 'AI-powered chatbot' to assist users by answering college-related queries or information in real time, enhancing the overall user experience.

## PUBLICATIONS

---

**Research Paper** on [FRIDAY: Personal AI Companion](#) [2024] at International Journal of Advanced Research in Science, Communication and Technology

This research paper includes the R & D done on "FRIDAY", and explain the AI technology and its benefit's. Explanation in detail about the technology's used in development of FRIDAY.
